DONGKUK STEEL GROUP

Color the world with steel

Starting with the production of small nails, Dongkuk Steel Group was founded in 1954. Through endless challenges and growth Dongkuk Steel Group is now a leader in the global steel industry. Over the past 70 years, Dongkuk Steel Group kept true to its philosophy to continuously develop new products and services contributing to economic and cultural growth and above all focusing on nurturing and advancing the people who make these products.

Dongkuk Steel Group will continue its tradition while moving towards the centennial anniversary.

DONGKUK COATED METAL

Global No.1 Color Coating Company

Dongkuk CM began with the title of being the first in Korea to produce color steel sheets and establish a continuous galvanizing line. Since then, we have maintained top quality, leading the global color steel sheet market. By adding color and functionality to the strength of steel and presenting application methods for individual and industrial use, we have reinvented steel as a new type of building material, expanding its scope and establishing a solid business model.

Dongkuk CM is a company that brings new value to the hardness of steel through the addition of color.

New Paradigm

DIGITAL PRINTING

Digital Printing is a new product that will revolutionize the paradigm of the steel printing market. Digital Printing, which is capable of realizing high-resolution infinite colors without pattern restrictions, can produce discontinuous patterns longer, so it relieves not only unnaturalness and fatigue caused by pattern repetition of the existing Gravure-offset roll printing production method, but also guarantees weather resistance which is the only and the first color steel sheet technology developed in the world for exterior materials.

Complete your creative design with Digital Printing, produced by the world’s first Roll to Roll Dot printing facility, in which all color technologies of Dongkuk CM are integrated.

Characteristics

Unlimited colors & patterns

High-resolution colors

Longer pattern repeat

Weather resistance guaranteed

Eco-friendly products

Reasonable price

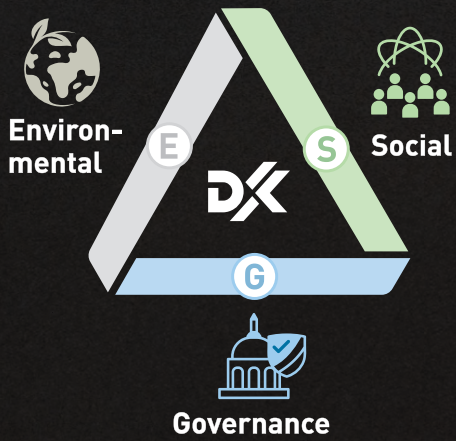

Move Together Move Green

" We provide products and services necessary for the improvement and advancement of human life and further contribute to the development of culture." Dongkuk CM pursues social values for a 'better society' and a 'sustainable environment' based on it's management philosophy of 'giving back to society.'

Environmental Product Declaration

Dongkuk Coated Metal has been certified by the Environmental Product Declaration (EPD) as we comply with global standards to produce eco-friendly steel for a sustainable future.

WOOD collection

Wood pattern products include the warmth of a lumber which is a construction material that has been beloved for a long time, while expression eco-friendly designs.

The image displays a series of vertical wooden slats, or lamellae, against a dark background. The slats are arranged in two main groups. The group on the left, spanning pages 24 and 25, consists of lighter-colored teak slats. The group on the right, spanning pages 25 and 26, consists of darker, more heavily grained teak slats. The slats are separated by thin, dark vertical gaps.

DIGITAL PRINTING

Structure

Process

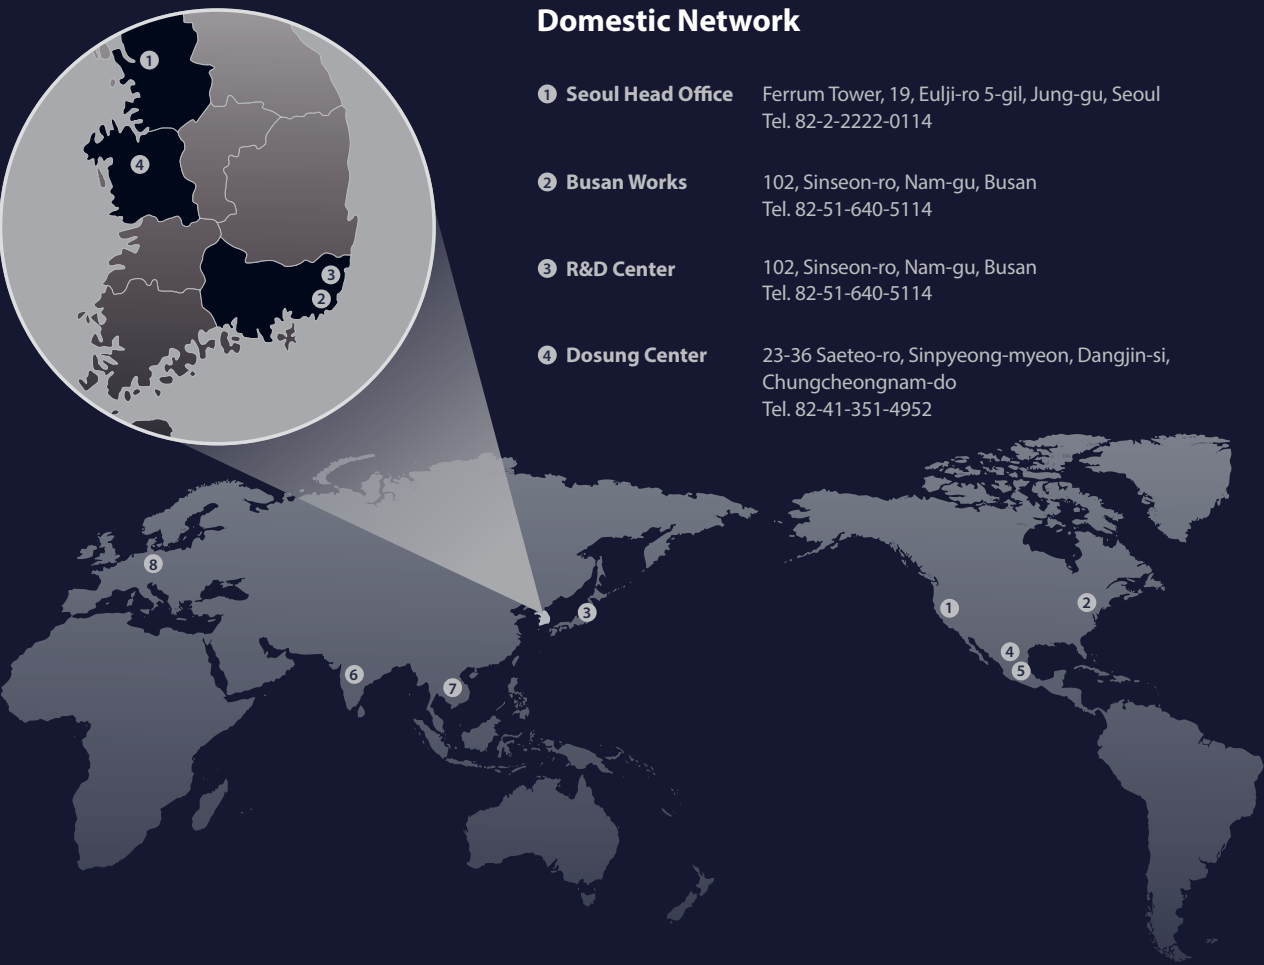

Digital Printing products avoid the use of toxic substances (cyclohexanone, which is designated as a hazardous chemical and will be regulated starting from 2026). This leads to improved working conditions in the printing process sector. At the same time, the combination with gravure-offset print technologies overcomes the limitations of color representation.

* All products shown in the catalog may vary in color from the actual steel sheet product.
* Unauthorized use may result in legal liability.

Network

Dongkuk CM has 3 locations in Korea. Corporate head office in Seoul, the main production facility in Busan, and the Dosung center for special LUXTEEL processing in Dangjin.
Dongkuk CM's global network is operating in 5 countries with branch offices in the USA and Japan, and coil centers in Mexico, India and Thailand. We have expanded our global coverage to increase service to our international customers by establishing a 2nd coil center in Queretaro, Mexico in March 2023, and the opening of our Europe office in May, 2024.
